THE GERMAN REPORT

(Note: The following is reprinted EXACTLY, word for word, as it was smuggled out of Germany. There are, of course, errors of grammar and spelling, but we felt the atmosphere and spirit of the original is too precious and perhaps holy to be tampered with. We are sure the intelligent reader will have no trouble understanding the meanings.

We also caution all readers to be VIGILANT of this document. A man's life may depend on the maintenance of tight security, - by EACH person to whom this is entrusted. Should it fall into the wrong hands, the Jews would stop at nothing to search out the writer in Germany and try him for "war-crimes", etc. Need we say more? --BE CAREFUL!)

ANALYSIS OF THE POSSIBILITIES OF A REAL REVIVAL OF THE GERMAN PEOPLE

The main factor that destines our way is our goal (aim); to fix one of its various stages we must say:

The first goal is the constitution of a new and real German government, and that can only mean: a National Socialist Government, even if it on account of the present conditions of "right" and power for the first few years cannot appear under this name.

This constitution of the government is only possible by legal means, that means that we must be elected as a political party with absolute

A MAN'S LIFE OR LIBERTY MAY DEPEND ON THE CARE YOU GIVE THIS DOCUMENT! DON'T LET HIM DOWN! BE CAREFUL!

majority.

That is (on principle) in itself possible even today.

In the past 12 years there have been made several attempts, but all of them were wrongly applied to (laid out) and above all did not have the necessary reliable and capable (qualified) leaders. As the first attempt of this kind one can regard the SRP (Socialist Reich Party) which was forbidden (prohibited) in 1952 (or 1953). Its first and leading chairman, a certain Dr. Dorls, was an agent of the socalled "Verfassungsschutzamt" - the present political police - which is afterwards has become known. This mistake (blunder) was not at all necessary, for Dr. Dorls was not even as good a play-actor that one could not easily find out him.

The second chairman, General Hans Otto Remer, was and is an enterily unobjectionable character, but unfortunately no judge of men at all, and therefore liable to be taken in by every cheat.

The third man, Dr. Gerhard Krüger, was (no doubt) indeed no traitor, but totally no idealist too, He is a dull, ambitious man without any feeling of responsibility. Today he stands in the DRP (German Reich Party).

Naturally Dr. Dorls was soon looked through by some capable leaders, who were come out of the Hitler-Jugend, and these absolutely honest man were already going to reject him. How far this would have been possible still under the whole already somewhat muddled circumstances, I will not try, but probable this "danger" for the agent Dr. Dorls was the main reason for the political police, to effect the prohibition of the SRP. (In addition to that one can think of the fact that in some towns of Northern Germany, where there have been especially capable sub leaders (Unterführer), the SRP had already obtained about 40 per cent of the total poll.

The majority of the conscious National Socialists did not have enough confidence in the leadership of the SRP, and therefore they did not take part in it. Some activ men went into the "great" parties, especially into the FDP (Liberalistic Democratic Party), and tried to get from there in important positions. Of one attempt you surely have heard: some years ago the government of Nordrhein-Westfalen in Düsseldorf, which were composed nearly only of traitors, was brought down, and on their places came also a few activ former leaders of the Hitler-Jugend. But they too could make nothing from this succes, for they stood there quite isolated, and did not have any organized support. The same party, the FDP, on the steps of which they cleverly raised, then had become a really insurmountable obstacle to them.

Of the further attempts the most known is the DRP (German Reich Party), which has as members prevailing honest National Socialists. But the leading men are nearly all traitors.

The present first chairman, Professor Kunstmann, as well as Herr Adolf von Thadden, are suspected of being agents, in any rate absolutely intolerable and must be rejected. And the third man, Professor Hans Bernhard von Grünberg ought to be hanged at the first opportunity.

Some further national party-leaders are indeed honest, but are not enough men of mark to address and to call up the German people effectively and to be a match for the Bonner rogues and their jewish instigators.

And of all of them the words of Adolf Hitler, as qouted by you in Number six of the NATIONAL SOCIALIST BULLETIN, prove right (are true) in some way or other.

The many disappointments and failures have lead some honest, but too superficial men to the conclusion that the German people were being too sleepy, too satisfied (saturated/satisfied), too indolent and indifferent, and that therefor there must be a large economic crisis and much trouble again, for being able to do something with them.

This I consider (take to be) fundamentally

wrong.

Indeed, it would be a great mistake, to overestimate the German people, and I myself would ask every comrade not to do so; but here is the situation is somewhat else.

These in itself honest national men in Germany do not realize the the failure is theirs, personally.

They think that they can make the people, consequently the led ones, responsible. But to pass the buck (responsibility) downwards is always a sign of incapacity.

Yes, in fact, it would be a bad sign (token/ testimony) of our movement, and it were not the great movement which will give the law to the coming age, if the Jew could simply eliminate the National Socialism by a general prosperity that would secure his rule. The Jews themself do not believe in it, and they know very well shy. They know better than the most of us that a spiritual movement, once it is created, goes its way through history according to its own internal laws. And they know too that in the people there is a deep discontent - in spite of the socalled prosperity - which only waits for being waked by a selected (competend) one. For the man does really not live of bread alone, and most people are dull conscious of this. And nobody of the democratic "idealists" gives them bread, but only stones.

It is quite naturally that the majority is not conscious of their own discontent. That is a law of the nature of the multitude. If anybody addresses they thereupon, they will say: Why, we are well. What shall we want more or other?".

And yet they do want something other (else), something better, and they demand (long) secretly for a new Adolf Hitler. And it is for this reason that in so large circles of the people so obstinately goes the saying that Adolf Hitler is not dead, but lives in the concealment and will come back some day.

And they are right! The spirit of Adolf Hitler is alive and will come back and with far greater strength and power!

Then gnade Gott allen Verrätern!

To consider some appearances: It is a fact that every year again after 1945 the socalled German authorities start a new propaganda campaign against the National Socialism.

Why? Why so in 1953 as well as in 1960 and 1961?

One will understand that better by looking nearer to certain things: For instance said an official speaker at a public occasion of the traitors to our country on the 20th of July some years ago in the Evangelic Academy (more correctly it must run: academy for traitors to the country) at Loccum that "the present democracy in Germany were only a thin film of oil of the parties over the latent multitude". That should mean that the main body of the German people is still waiting for an Adolf Hitler. - And that is in fact the truth.

Still more distinctly (clearly) it was said by the traitor to his country and Kirchepräsident - president of the Calvinistic Church of Hessen - Martin Niemöller at a official journey in the U.S.A.: "In Germany the time is unfortunately already again very ripe again for a new Hitler; such one today would in short time again gather a great multitude behind himself."

He was right too.

This whole clique, ruling at present, as established after 1945 by the Morgenthau-boys with the help of the allied forces - in first line of the U. S.-forces - know from their various news services and the "Institutes for the investigation of the public opinion" very much better than many honest Germans, what the people really is thinking. By chance I have heard myself through a comrade from a co-worker of such an institut of the result of such an interrogating. Among others there was put the question: "Which German has in your opinion done the most for Germany?" - And 7 per cent have answered: "Adolf Hitler." To this one must consider that the very most of the German National Socialists would never give such an interrogator any answer at all, and many others a misleading answer.

Of course, that is in no paper, but are kept secret for obvious reasons.

This year I have worked at the Election office during the recent Bundestagswall. At the counting of the votes this time I have seen myself, what also never stands in the newspapers, that about 5 per cent have made Swastikas, "Heil Hitler" and other remarks on the voting-paper, or have them simply cancelled, or let quite free. Considering that many National Socialistic Germans do not vote at all, some others for some reason or another elect the CDU, the FDP or even the SPD, and the voters of the DRP and the others of the small national parties are in any case National Socialists, then that means in practice that a right party, led by capable, qualified men, who are able to convince the people that they are the right ones, already at the first election will obtain at least 10%, but probably 20 per cent of the total poll.

The revival of the German National Socialists, and that means the German people too, is first of all a problem (issue) of leadership.

We are not likely allowed to expect that the Providence will give us a new Adolf Hitler. Such great and unique individuals are only given once in a thousand years.

But I do not doubt that in Germany there are today enough able men, who common (joint), as a leading team, can solve the extremely difficult task.

Now the problem looks about like this: One of them perhaps lives at Hamburg, another at Munich, and a third one in Essen, Düsseldorf, Hannover or elsewhere, and none of them knows of the existence of the others.

Under the present circumstances and conditions it is already most difficult for such men to find together, because today and here it is not possible, to gather those men, and their first important disciples too, by way of public demonstrations of any kind whatever, as it was possible before 1933 and in some way is possible even today in some other countries.

Thus the being found together nearly depends upon the very lucky chance, or perhaps a place of appointment beyond of Germany.

I need hardly say more about this, for I could imagine that in, say, the next 12 months some very good Germans, up to date quite unknown, will address you.

However agents and traitors too will address you! This must be taken in account.

In the general excitement following the going over of Otto John to the East, it has become known that the "Bundesamt für Verfassungsschutz" has paid higher amounts of money to persons - and, of course, pays still further - who are publicly and even judicial (legal) pilloried as "Rechtsradikale", "Neofascists", or "Neonazists". That means nothing else than that there are several bought traitors standing in the present socalled "national" camp of Germany, and naturally in high places. And that again will make some things clear (to understand) among these "national" Germans of today.

Under the present conditions in Germany it is quitė naturally that there are the various political groups being formed (constituted) by the various small spirits. After the sun has set, the veriest small stars beginn to appear. This fact is deplored by some honest comrades as "unfortunately splittering of the national powers". Then they talk thereof that one must collect (comprehend) all those small groups, because the Unity yet be the supposition of the strength.

Against that already Adolf Hitler has pointed out that 8 cripples gathered up will give by far no athlete.

Indeed it would be the greatest mistake, trying to build up a new movement from such a conglomeration of small bunglers, visionaries, odd persons, and agents of the Jews!

The true great Unity can only come out of the force of the one movement. Today more than ever there is only a single way for us, namely that, which Adolf Hitler has marked to us. And

anybody that is not prepared to subordinate himself unconditionally to the spirit of Adolf Hitler is already therefore questionable and must drop out. The socalled splittering will never be overcome by compromisses, but only by the force of a great leader and of our faith that shines upon all (our all overradianting faith). And also a leading team can only gain the power for successful acting from the subordination to the law of the National Socialist World View. Of 60 small and shortsighted national managers will never grow any functionable leading.

But only round the genuine (true) leader gather the able men, who are a serious match to our enemies.

I.) What is the present situation in Germany?

What suppositions are given?

1.) There is still always the occupation right in force, which gives the occupation forces - U.S.A., Britain, France, but also the Soviet Union - certain rights, of which at present is not made much use, but which provide an important legal argument for the interfering of those powers in internal German matters in case of need.

2.) Still more important is the NATO treaty that provides explicitly the right of the main powers, especially of the U.S.A., for intervening into the internal affairs of any NATO country, if by a certain development the interests of the other NATO powers seem to be endangered. The very vague definition of this section allows many interpretations to the might ones.

3.) The socalled German government:
After the 8th of May 1945 thought a high British official, whose name I have forgotten, that he should reproach Winston Churchill with the question, how he could "co-operate" with "these Germans", that means the government of Dönitz. Hereupon Churchill replied: "Will you stick your hands into an ant-hill, or do you want to have a stick to rule the Germans?" - (Retranslated from a German translation, therefore perhaps not quite correct.)

With this sentence of Churchill is said all that can be said about the "German" government at Bonn. Surely, Dönitz had proved himself unfit to be the stick of Churchill and his Jewish fellows.

But instead the Allies afterwards have found people, who were and are very much more suitable for this job. It were this people, who were presented to us in 1949 by the Allies, which we were allowed to elect in "free elections". And they are exactly the same people, who have gained the "confidence" of the Allies, or more precisely: of their Jewish instigators, in first line by the fact that they do have because of their base characters, and their dirty and perfidious past, or other selfish inclinations (movings/instincts) a personal interest in the paralysing of the German people and, destined to this, the persecution and suppression of the National Socialism, and in the atrocity propaganda against us, or who are directly dependent on the powers that we know as the unconditional enemies of Germany, Europe, and the White Race, thus being the natural enemies of the National Socialism.

This refuse (dregs/expectoration) of the German people is given the power by the Allies. And, of course, they will never saw off the branch, on which they are sitting. The pure instinct of selfpreservation is already urging them, to persecute every genuin German movement of renewal - and there is no one besides the National Socialism.

Then that must be said and understood quite clearly: in the U.S.A. and in Britain too, many of the opponents to the National Socialism do not know much about the real (true) National Socialism. We have the Americans, who have come here as occupation forces, sometimes regarded as being 16 years old. We have actually met American soldiers in 1945, who did expect to see German National Socialists with genuin horns growing out of the forehead.

But in Germany the situation is somewhat else. No German, say, up from 30 years old today, can say that he is or was ignorant of the

true appearance of the National Socialism. Of course, Millions of simple people, who by nature did not have a very firm memory, have been overcome (overpowered) since 1945 by the monstrous propaganda, at any rate at the surface. But not a single one of the intelligent - or socalled intelligent - Germans, who at present are activ as journalists, editors of papers, authors and publishers of "antifascistic" books, Trade Union functionairies, politicians of the CDU, SPD, and other "antifascistic" parties, etc., no one of this whole evil rabble, which are working according to (in the sense of) the Morgenthauplan, can say that he had not known the real truth about the National Socialism and the German history from 1933-45. They are all, without any exception, conscious traitors. Perhaps it seems to be not quite conceivable that there should be such large a number of traitors in a country like ours. But remember that in 1945 the occupation forces indeed have removed every German out of his position that seemed important to them (to the CIC). For instance: not a single publisher was being allowed in the whole of Germany. - Even scavengers were fired, because they have been members of the NSDAP, and officials of the administration, fired out of their positions, must sweep the streets. University teachers and professors - exactly every third! - were fired too, and must try for years to earn their living - and for their families too - with some low paid manual labour, just for such men a nearly impossible matter! The rest of them was and is terrorized by their antinazi "collegues", the triumphant traitors, especially the professors of theology.

Until 1949, that means during 4 years, the Allied Jewish authorities have very carefully choosen such men in Germany, who are interested in the present shameful situation of Germany, men, who have acted against their country, men, who publicly declared that "they did not know any fatherland that name is Germany" !

And still 1953, to the second elections to the "Bundestag", the U.S. Secretary for Foreign Affairs did warn the German people publicly, to "vote right" !

4.) Forbidden by special laws and actually punishable is every "glorification of Adolf Hitler and of the National Socialism", that means any publicly expressing of the truth about Adolf Hitler, likewise the "spreading of National Socialistic ideas".

The recent issue of "The Northern European" brings a few cases of this kind, as quoted by the "Jewish Chronicle".

Likewise punishable is the expressing of the truth about the Jews and the traitors. Even the criminal police is paralyzed towards simple Jewish criminals, for otherwise they must expect being fired for "antisemitism".

But, of course, every filthy fellow is at total liberty to insult our country and people, our nation in the very evilst way. And no court will deal with the, or can deal with them, as for instance the lawsuit by General Ramcke against the rascals Erich Kuby and Rüdiger Proske - both prominent radio wretches - has shown.

5.) As a special organ for the "protection of democracy" there is the political police, the socalled "Bundesamt für Verfassungsschutz", established under the leadership of the well known Otto John, who was the particular friend of the British authorities that have insisted upon his putting into this place. Reasons for this "British" judgment see above. (And the British cannot say that they did not know Otto John, for he had worked during the war in close connection with the British services as traitor to his country, thus shown his base character enterely well enough.)

6.) Then there is the "Bundesverfassungsgericht" (court of the constitution) that pronounces the decisive prohibitions and bannings. It needs, that is true, at least approximately concrete evidence, but that is usually no insurmountable difficulty. Of the 28 judges of the court are 13 Jews, and that needs no comment.

7.) Further there are the various democratic curs (tykes):

a) the Trade Union Curs,
b) the Churches with their organizations,
c) the mischief-making papers, radio and TV as coursedogs,
which all are working as guard-dogs, track-hounds (beagles), and also as terror-dogs.

The Trade Unions do have special informers (spys) - socalled "men of confidence" - in rather all important factories and offices, who gather informations about "national suspected" persons, but also seek after old National Socialists, who have disappeared after 1945!

Not to speak of the "antifascistic" morality toads. As for this beast of political bullies, prostitutes, and traitors of all confessions, that has learned to grunt morally after 1945 as "antinazi democracy", the perpetual cramp of penance and the steady self-abasement is indeed the highest form of morality, to which it can be raised.

8.) The main factor is naturally the German people itself.

Firstly the fact must be stated that the National Socialistic movement is the very gist (essence) of the German nation, as in future it will be in all the other genuin White peoples. Without the National Socialism we are hopeless lost, we Germans as well as you Americans, the British, French, etc. There is nothing outside the National Socialism, what could come into question as a positive factor.

Within the National Socialistic movement in the main all depends upon the generation of the Hitler-Jugend, that means, roughly outlined, the classes between 1920 and 1930.

Of course there are a number very valueable National Socialists of the older generation, upon whose co-operation we will not and cannot renounce; but regarded in the whole, the old generation is exhausted. They have done their duty, and more than that, and the majority of them is fallen in the war. Now the younger generation must continue the great work.

And within this younger generation in the first line it depends upon the leadership (Führerschaft) of the Hitler-Jugend.

These men of this day, who have taken in the National Socialism in its living reality already as boys, and above all have practically exercised themself in the National Socialism and developed themselfs under its great principles, these men do have a much more profound, close, and firm (steady) relation to the National Socialism, than the great majority of the older National Socialists could have had. They have but really the inner suppositions for acting National Socialistic, and without all the democratic and other reservations, which have adhered so widely to the older generation and have been more than once the invasion-places (gates/doors) for the hostile forces in some critical moments.

With this young generation the German nation has a great advantage compared with the other white nations. But this advantage is compensated by the monstrous (immense) oppression being exercised by the followers of Morgenthau.

And one must take into consideration that only that part of the German people can be regarded as this asset, who ist activ by nature, by his dispositions (abilities), of course the most valuable part of our people.

Considering the German people as a whole, one must realize that by reason of the present biological composition and condition only about 10 per cent of the people can be regarded as this true gist (essence) of the people. This 10 per cent are the nature-given Willensträger and Ideenträger (carrier of will, idea and energy), of whom depends upon every activ development of our fate. Only they are able by nature, not only to take in the National Socialism, but to be its conscious and independent supporters and champion, resp. to become those.

The second big group in the German people constitutes about 15 per cent. They are men, who are good willing by nature, and perceive or

feel the value of a movement like the National Socialism on its appearance, and strive after the connection with it by good will. They are good co-worker (collaborators), but already unable for any New out of themself, and are also not able to stick to the idea independently, or only to carry on it to their own children. In such men the worths (values/the good) that they once have received will crumble away from year to year more in a time like that, which is ruling for instance in Germany since 1945.

Many of them there have been in the NSDAP, and in the SA and SS, what in itself is and was quite in order, only such men must not be put into leading or decisive positions, even if they are professors, etc.

The third group forms about 50 per cent of our people. These follow always more or less good-natured that power that is just ruling, that means simply the occasionally strongest. Some of them need sometimes husky (peppy/energetic) words in order to be well and to go on at the right way.

They are the socalled average Germans with all their faults and merits; the main body of the German Wehrmacht with its brave soldiers was constitutes by these men. They are no volunteers, for their instinct of selfpreservation will always be fominating, but they do their duty and sacrifice silently and without making a fuss about it, when it is demanded of them by the sake. They are also the industrious, efficient, and in themselves unpretentious German workers, for whose rights the activ National Socialists ought to stand up, and who he has to protect against the insane egoism of many of the liberalistic manufacturers and other employers.

One cannot cast it in their teeth that they today, when their true leading is taken from them, cannot offer resistance towards the monstrous attacks of the Jewish directed propaganda; and also not that they succumb the thousandfold seductions of the present contagious "way of life", thus making themselves ill or render a ape.

They need a strong and good leading! That is our task!

These average Germans are by nature not particular interested in politics. They do not have any "opinion", but what is called so, is only the reflecting of that, what the press is howling and humbugging to them. That is their disposition, and it would be wrong to persuade them to co-operation in a political party, if they will not, like the best of them, by themselves co-operate.

Only their children should be erfasst (siezed/hold of) by the youth-official-duty, as they will by the military service and the industrial conscription (Reichs-Arbeits-Dienst). After that finished their conscious political service, if not some of them will become a voluntary co-worker (Stormtrooper).

Indeed they insult sometimes, and talk often political nonsens, but they are harmless (inoffensiv) by nature and valuable and necessary at their place.

Not quite as harmless is the next group - the fourth - which one again can estimate with about 15 per cent. They are already only by threat of punishment to restrain on doing harm to the society. They are already more or less degenerated and unsocial by disposition. So far as their degenerated inclination lies on the criminal sphere, they are previously convicted throughout. But also the twisted followers of the Jehovah's witnesses are belonging to them, likewise the ardent sympathizers to the Marxism of all shadows, and also the decadent highbrows, who think that they are the centre of the world, that they must have special rights because of their "culture", and just so belong all actors and most of the journalists to them. This is one of the main reasons, why the Jew find the main body of his unconscious jackals just in this class, who are often quite intelligent, but do not have any instinct (feeling) for the godlike orders of the life, for the responsibility towards the nation and the Race. They feel very flattered in their insane Egotism and vanity, when a Jewish chief-journalist - for

instance in the "Frankfurter Allgemeine" or in the "Zeit" - patronously allot them a praise. Then they make at once another "antiracistic", "antinazistic", or other belly-dance with biting themselves into the breech.

Some of this class have been trespassed (penetrated) before 1945 into the NSDAP, where they because of their abilities in putting it on and because of the lacking vigilance of the true National Socialists even have got into important positions, where they naturally did nothing but damage (mischief).

Finally we must speak of the last 10 per cent of the German people. To say it beforehand: They are people, who properly all must be executed. Yes, this percentage is actually as high as this. They are men, who are prepared to any treason, men, to whom nothing is holy aside from their own selfishness. To them belong the criminals, who by no punishment are to deter. To them belong further most of the "important" politicians of the democratic Germany, but also those underworld creatures, who e.g. have let died rather 10 of their comrades as soldiers in the war, than doing their own duty, and therefore today have highly paid jobs at the radio in Western Germany for instance. They are the eternal antinazis par excellence.

And the press is in no way better. Above the super-gutter-paper "Bild" of the main-pig Axel Springer, who is well known at Hamburg for his sex-parties, and all the picture papers and the "great" democratic papers which cause phlegm out of themselves their nauseous Jewish filth, and try to get it into the German people.

To this fifth class belong also all the creatures, which today are glorificated as socalled "resistance"-heroes; officers, who during and already before the war have acted against Hitler, thus supporting the Jews, which were trying to bring Britain into the war against Germany, men who hated Hitler in envy of the great man, and some of them, because he had reminded them of their duty towards the nation. Men like Beck, Canaris, Weizsäcker and the whole clique of cripples of character, who unfortunately - some because of the noble and generous spirit of Hitler, many others because of the lacking vigilance of (alas!) many National Socialists - have been in the key-positions of the Wehrmacht - particularly in the Staffs - of the Reichsaussenministerium, and, worst of all, the intelligence service and the police, are dominating the whole "German" state of today; they swallow every box on the ear, every kick, administered to them by the Jews, if they only are allowed to tyrannize their own people as the governors of Israel, and to sponge on their own people. They are the ones that are personally interested in not letting rise any true German movement - and especially the National Socialistic movement, which is the only movement able for the future.

Thus the Jews have gained their best allies, which they can kick, but who nevertheless would serve the Jews as their very obedient servants, particularely as the Jews of course give every liberty to their insane inclinations, wishes and desires, which just as naturally the National Socialists did not do any must not allow. For that is in fact the true face of the famous "democratic liberty", that and nothing else. The Jew can easily leav them their liberty, because it is the very way, to lead the nations into slavery and finally into dead.

What is at present the situation of consciousness in the German people? In normal times it are the 10 per cent of activ men of group 1, who destine the consciousness of the whole people (except that of group 4 and 5), impress on it and lead it, how it is in conformity (correspondence with the laws of nature, and it is to the benefit of the whole (except the criminals and the parasites).

At present there are the 10 per cent of class 5, brought above and hold in power by the Morgenthauboys, which dominate the consciousness of the people, trying to get every possible falsification (fake) into the heads of them, in order to secure their perpetual domination, regardless to the consequences. (And they have today the whole amount of taxes(duties) to their disposal.)

Now the superficial consciousness of the class 3 but widely also of class 2 reflected in some way or other that, what press, radio etc. have spit out since 1945.

But yet the Bonner and their Jewish masters are not satisfied.

Why not?

Under the surface is a deeper layer (Schicht) - the subconsciousness - which is at least in the groups 2 and 3 still widely impressed on by Adolf Hitler and the National Socialists.

And a big part of the classes 4 and 5 are persecuted by a deep fear, created by their bad conscience, for the announcement of the eternal laws of all human life by Adolf Hitler with the power of his god-inspired person has had its effect upon those people too, naturally, according to their bad and base condition (disposition) there could only be a negative impression.

Thus and for their cannot but do harm, they live in a steady secret fear, hopening against hope that they will never again see the National Socialism, which will call them to account.

But their hope is in vain.

In the years of 1920 till 1945 has been sown a seed that now begins to come up.

And the defeat of 1945, the sacrifice of Germany, was necessary for the victory of the National Socialism in the whole world. There are defeats in the life of any individual as well as in that of any nation or movement, to that one is not allowed to evade, but which must be gone through, in order to reach the goal and to gain the necessary strength.

The laws of history are severe and inexorable and not to be escaped.

Thus the representatives of the negativ groups, though ruling at present, fear the National Socialism, of which in the subconsciousness of 75 per cent of all Germans a more or less great part is still alive, and which is carried on (weitergetragen wird) by every tenth German quite consciously.

In the generation, today being under the age of 30, it looks somewhat worse, as they do not know the National Socialism for themselves, but only from the devil-propaganda of the enemies and murderers, or from stories, told to them by their parents, or by more or less good older friends. And not much of the older generation are able, to give the younger the right picture. Thus there are among the present young people some very czarky (faddy) and twisted "antinazis". Many of them, of course, belong to the groups 4 and 5.

One must consider too that the German schooles and the public education in Germany generally have been widely bungled (foozled) according to the Morgenthauplan. It is true, many of the teachers refuse to pour the poison into the souls of the youth, but it is a fact that also among the teachers one must make the distinction in the groups 1 til 5, and in the same proportion of 10: 15 : 50 : 15 : 10.

And in many schooles, particularly at the universities, the minority of the class 5 have gained an evil power and terrorize their collegues (whereas the men of group 1 and 2 were altogether fired and many of them still today are out of their position), quite apart from the new appointed Jewish professors, coming from the U.S.A., who for instance here at Frankfurt dominate the whole university.

Here too must sweep an iron broom.

Drawing up the balance sheet, it looks somewhat like this:

Here in Western Germany live about 50 Million Germans;

that means about 25 Millionen male;
about 8 Million are children and youth under the age of 20;
remain about 17 Million men.

Because of their disposition by nature only 10 per cent of them come into question as activ political fighter, that means 1.7 Million men. 500, 000 til 700, 000 must be subtracted - for the beginning, of course - for they do not know enough of the National Socialism, who must be won but in the future, being today potential National Socialists.

Thus there are about 1 Million German men remaining, who can be expected that they will follow rather immediately the call of an able German National Socialistic leader, if one comes forward (steps forth).

Of them are about 100, 000 to be regarded as that part of the leadership of the Hitler-Jugend, who are fit (suitable) by nature and attitude for being sub-leaders of the coming movement, and about 10, 000 as Leaders for higher tasks.

This may be the stock of useful men.

The first practical task is now, to gather the gist (nucleus) of those 10, 000. This is the first and probably the greatest difficulty.

II.) What advantages are in the present situation?

21.) An advantage to us is the inner weakness (infirmity) of the democratic government at Bonn that already therefore cannot have the necessary strength, because they are established by the occupation forces, and did not come out of real free elections, nor did they owe their present power their true own strength in any other regard; they do not have any real resonance in the people, not even in the youth, although the youth is only given a totally distorted and falsified picture of the National Socialism. Only now, in october 1961, I read again an announcement again of an political lecture: "Why is the youth thus against us?" -

And the ruling democrats cannot offer any other answer than "The youth is seduced by Adolf Hitler." -

The people and the youth take no interest in the democratic politics.

Now the super-gutter-paper "Bild" is trying, to implant the people some more political interest in the Bonn spirit by the wood hammer, for obviously its manager Axel Springer has received some bigger bestowals (allowances) of money from the reptil funds of Adenauer.

But the biggest party today has just one thirty-second of the number of affiliates of the NSDAP.

Even in the academic youth, the ASTA, the official democratic Dachorganisation of the students, has not even 10 per cent of the students behind itself. Also the trade unions have in some branches hardly one-half of the workers as members. And many are only members because of the certain pressure, as for many of the organized students the consideration of getting as surely as possible a good paid position in the state is well to the fore.

And it is interesting too that in Western Germany 23 per cent of the marriages are no longer ecclesiastically married.

22.) The dwarfishness and incapacity and the so obvious depravity of the nominal rulers is also an advantage.

But to be sure, one must not forget that they do not make the politic in reality, but their Jewish instigators (and also their clerical ones), who let the puppets dance and are themselves extremely clevere and dangerous fellows, who shy at no mean act.

23.) A further advantage is the fishyness of the hostile propaganda, and thus the fragilety (brashness/crazyness) of the artificial picture, that is tried to implant to the people. Therefore it is absolutely wrong - as it is tried again and again by socalled national men, particularly of the older generation - to reduce the entirely fishy number of six Million killed Jews, es for instance a certain Dr. Kleist does: "There can yet at the most be killed only 1 Million Jews."

Who talks thus, is either unable to politics,

or paid by the Jews.

And we must not cooperate with such people.

24.) A very essential advantage that is not seen by the most National Socialists, is even created by the monstrous atrocity propaganda. Already 80 years ago Friedrich Nitzsche realized:

> "It seems that all great things, in order to write themselves down in the hearts of humanity (to impress themselves on the minds of humanity) with eternal claims (demands), firstly must walk as monstrous and frightening fear inspiring) mug (grimace/Fratze) about the globe (earth)."

As Adolf Hitler, the elevated (exalted) creator of the greatest and purest faith, could not distort his work himself, the wise Providence has left this to the Jew, who because of their immoderate delusion do not see that they by their propaganda, with that they will inspire the men with fear, in order to make them more compliant (complaisant) to their ends, at the same time give the National Socialistic laws an unheard-of weight (force) and severity (heaviness).

The distorion will be abolished subsequently by our reality.

Beyond it great parts of the people, particularly the youth, have become much harder by this perpetual atrocity propaganda, have become immun from moral jostlenings and attacks of all kinds, as opposed to the civil-moraly effeminate (coddled) Germans of the older generation, who have suffered a shock already at the thought on the possibility that there could have been something (anything) true in the Jewish assertion (statement) of the 6 Millions killed Jews, and have cut off their right hand voluntarily and by themselves. (Thus - figuratively spoken - have behaved even many former members of the NSDAP!)

The youth now grown up is more American also in the positive sense, namely harder, more consequent, and carefree (uncompromised) by (of) restrictions (inhibitions/checks) and moralities that finally would only be of use to our enemies.

Furthermore the flood of the dominating influences of all kind is creating new conditions of selection; for instance will be eliminated many of those people, who after the winning of the power would fall into corruption or fail (flunk) otherwise, likewise will be eliminated all weaklings, who are yet only a burden (trouble) to the movement and a blockhead on the leg of the activ fighters. The movement is as it were (so to speak) going through a bath of acid: all the sick is browsed, but the healthy ones must gather up and are not allowed to take it easy (indulge their inclinations), to prevent the destroying poison from penetrating into their spiritual body.

Then the Jewish virus too, the ferment of decomposition, could be regarded as having a vital task in the great process of life (vital functions). As the virus' of rotteness (putridity) assail all the dead in the nature and the not enough viable, and disolve it to mould, so one can also regard the effect of the Jews.

Then we must know that with every great development upward is always connected a great crumbling away and perishing. That is a law of the nature, and thus the Jew perhaps can also do a contribution to the good, as for instance Goethe let say the Mephisto:

> "I am a part of that power that alway will the evil, and yet ceate the good." (Of course, there are better translations of Goethe than my sentence.)

Or in the prolog to the "Faust":

> "The man's activity can slacken much to easy,
> he loves soon the absolutely rest;
> Therefore I give him the companion(fellow),
> who irritates and works and must as devil do!"

But of course, we must always take care that the virus never increase and penetrate in no circumstances into the vital parts of our national organism.

Therefore were and are the Nuremberg Laws of Adolf Hitler against the Jews, which had taken from them the citizenship, had prevented the pene-

trating of the Jewish virus in the biological body of our people - by race-mixture - , and taken from them the possibility of the influence over the public opinion - for instance by means of the presse - so absolutely right. They only must be completed by measures, by which all gentils too, who by reason of their degeneration are effecting in the same sense as the Jews, or as their organs - indifferent whether they are that consciously or unconsciously - will be eliminated.

25.) Selectiv separation of a) Traitors, b) Zufallsdeutschen (Germans by chance/casual Germans/accidental Germans), and c) conscious Germans, which latter are the carriers of the will of the nation and of our faith, and are alone able to shape the future and will do so.

Or, to say it figuratively: after more than 300 years of fateful (or disastrous) German history the Providence has finally (after all) separated the dirt (mud/mire/excrements) and the chaff from the wheat. Between the traitors of all kinds and us has been teared open a gap (cleft/abyss), which cannot be bridged over, and which is steady more deepened by the cult of the 20th of July of the wretches.

Those national fools, who actually will "close the cleft, that the 20th of July has teared open in the German people", those fools must be eliminated, without any respect (regard) of there perhaps famous names. For we ought not to close these clefts, but to deepen it until the absolute annihilation of the one part. This task is put to us by the eternal God himself. And any consideration or regard that could prevent us from fulfilling of this our most serious duty of life, is a lesson to the dead and must be eliminated too.

For:

"Es schreitet keiner in das Licht,
der nicht mit allen Teufeln bricht."
(No one will go into the light, who does not sever himself from all the devils.)

26.) All petty and mediocre spirits, who could have bungled (botched) the movement in spite of their good will, have no chance at all, likewise (not) all compromisers. Even those men, who, seeing not clear enough, say: "See in your opponent the fighter of the other side, who is also, like you, faithful to an ideal. Stay chivalrous." even those men are excluded, for the people naturally say : "Why, if your opponent is really faithful to an ideal, then you must be at least partly as bad as your opponents say." - Not a single one of our real enemies (the word opponent is really misleading!) has ever admitted that WE are fighting and faithful for and to an ideal. No, on the contrary, 16 long years we are insulted by them as being criminals or, for the best, dangerous fools!

The only one of our "opponents in the front line" who are really somewhat faithful to an ideal, though a very twisted one, are - or better have been, for Adolf Hitler in fact has won all of them, who really were faithful to an ideal - some of the communists. And there too one must always remember the fact that in the years from 1920 till 1930 nearly 300 National Socialists have been murdered individually (single) by those red "opponents in the front line, faithful to an ideal". (More than 40, 000 National Socialists have been hurt then.)

The present conditions have created an unavoidable compulsion (obligation) towards a greater ability and better skill (dexterity/aptitude), obligation to a better thinking over, for the putting into action (realising) of more spirit (mind/intellect) and for training it; obligation towards the perfect (able to become accomplished) organism, that like all organisms grow out of one single cell, which, tiny as it may be, must dispose about a complete "Chromosomensatz"; obligation for greater profundity, and for the tieing on the one God whose everlasting laws are only realized and recognized by us National Socialists, thus we must fight and will fight with his strength and power.

28.) Unlike the time before 1933, today the National Socialism is existing in all Germans - at least all those over the age of 30 - who by reason of their natural disposition ever could be activ National Socialists. Especially the existence of a generation that has gone through the Hitler-Jugend.

29.) Last but not least a very important advantage of the present time is the existence of the National

Socialist movement in the world, of them your party in the U.S.A. is the most important, but also our comrades in Britain and France will become more important to us.

The greatest blow to our enemies will be your victory in the U.S.A. The very fact of it will paralyze all the treason governments in Western Europe and especially at Bonn.

Already the increase of the National Socialist movement in the U.S.A. will terrify the Bonner jackals and bring the Jews into rage. And as the Jews are no Gods, though they are very clever indeed, they will surely make for fear and rage certain mistakes (errors), which will give you some new chances for addressing the people successfully and to grow in strength and power.

Therefore I think that also we in Germany ought to do anything, which is possible to us, which could help you.

As the socalled authorities at Bonn do not live by themselves, but have been established by the allied powers, that have been foolish enough to be the jackals of Bernard Baruch, Henry Morgenthau etc., and also today live of the authority (respect) and political support that foreign countries give to them, it will rather pretty change the picture, when in France, Britain and especially in the U.S.A. parallel movements are coming up and take over the power. Every victory that you will win, and that will be won by our British comrades, is a victory for us in Germany too.

And the Bonner traitors will feel it less easy to bann a real German movement and party, when they see their foreign cakes turn into dough.

III. What are the main disadvantages of the present situation in Germany?

31.) That there are - at any rate at the time being - still no fit leaders in Germany known to us.

32.) That by the reason of the dominating conditions in Germany there is nearly no possibility for gathering the most important actionable-leading-team.

33.) A further serious disadvantage of the present circumstances is the progressively decomposition and destruction of the national spirit in the people by the incessant Jewish directed brainwashing. Even for some honest National Socialists the sentence hold good (though I would rather say bad)that the steady drop will hollow out the stone. Therefore I say to every comrade: Do not give the diabolically calculated Jewish propaganda any chance to influence you unconsciously! Therefore only read the papers carefully selected, and only for the purpose of acting. Do not see any picture and TV, do not listen to the radio. Already the smallest things impress themselves upon you, and all the more sure, the less you are conscious of it. You must always think of the fact that the Jew is a master in the psychological warfare. Also all the compromising and unwise national papers and journals in Germany do have a bad effect, for actually in every number of them - and I know them all - is to be found some Jewish poison, of course unconscious to the editor and unfortunately also to the reader, thus he does not resist it and takes it in without knowing it. 16 years have passed since 1945 and I have already seen the bad effects of those publications on more than one honest National Socialist German. Therefore I refuse (decline/reject) them all regardlessly, for our effectiveness is at stake.

Against poison-gas there are gas-masks necessary, if one cannot avoid the gas.

34.) Also the 6000 Negroe-bastards, hitherto produced by the U.S.-Negroes in Western Germany are not just an advantage.

Therefore: whilst the U.S. occupation forces can also gain some positive importance, once you have taken over the government in the U.S.A., the Negroes must go here as soon as possible!

By the way: As to the "Bundeswehr": By reason of the conditions of selection and training of the body of officers, as introduced under the force (compulsion) of the Parliament, the Trade Unions, and the Churches, the body of officers is so bad that we must dismiss at least 90 per cent of the Generals and 50 per cent of the other officers. Immediately after the constitution of our

German government there must be formed a committee of inquiry for the trying of all officers, in order to put through the vital purification of the officers from any "spirit of the 20th of July". Even the smallest rest of this disease must be rooted out, otherwise it will grow a cancer, the consequences of which would be still more disastrous than those of the treason in the last war.

To be sure, the first result will be that the German Wehrmacht for the first 5 years will not be fit for defence. But we cannot avoid this risk.

35.) One of the most serious disadvantages of the present situation is the danger of a forced Soviet interference. At present the Soviets will no war, because they know very well that the democratic governments in Western Europe and especially at Bonn are the biggest point of weakness (factor of w,) in the world still not Communistic, and by their decomposition and destruction of the national will of life and survival do the best services to the future development in the sense of the Soviets. Therefore the Soviets see the government at Bonn quite gladly, though they naturally cannot say so for obvious reasons, but must even say the contrary

But the Soviets know quite well that genuin (real)

(true) national governments in Western Europe, and these cannot be else but National Socialist, - are the greatest obstacle, yes, the most serious danger to the Bolschewism at all. Therefore they are genuin supporters of the Democracy and will actually go to war to defend the democracy, and do not even lie about that. Therefore their true hatred to all "fascists", as they call us, for they fear already the very mention of the invincible creation of Adolf Hitler, therefore avoid whenever possible to use the word National Socialism!

Therefore they will take every opportunity to annihilate an upcoming movement, particularly in Germany, and be it by forced invasion in Western Germany or by war. The situation relating to the laws of nations, thanks to Roosevelt, Truman, and Churchill, gives the Soviets even a legal justification for that case. And as the representatives of the socalled free Western World do have the same interests as the Soviets in this respect, they will in case of "need" even deliver Germany to the Soviets as they have delivered their warm friends in Poland, to whose defense they ostensibly have gone to war, or they will themselves annihilate the German movement of life, because the Soviets want so, of course with the pretext to preserve (secure) the "peace" and to "give the Soviets no justified reason for intervening."

This actually danger we must respect (take into consideration) on from the very beginning, and that could mean very well that we in Germany must abstain from all anticommunistic expressions in the public, until we are strong enough - after having formed the government - to turn every Soviet attack into the National Socialistic Victory.

That means that our way in Germany perhaps on the face of it differs considerably from that of our movement in other countries, especially in the U.S.A., where not only the possibilities, but also the necessities are somewhat else than in todays Germany. We do live under an overhanging block that can rash us at any time, and must not try to move it, until we are strong enough.

(Here follows a carefully planned program for the coming to power of our spiritual Party Comrades in Germany. In spite of our informant's grammatical errors, his brilliant analysis shines through the foregoing -- and we can assure our friends and Party Comrades that our fighters will drive through to smashing victory, with typical German efficiency and thoroughness. We cannot, of course, reveal the methods to be used, and have therefore classified the plans section of this analysis TOP SECRET, which we feel sure our friends will understand and agree must be done.)
